

Metal Art

Popular metal art classes are available to create unique metal artwork. Club members make beautiful metal art utilizing club equipment and input from fellow members.

Vacation Mailboxes

Vacation Mailboxes constructed by club members provide a convenient way to handle mail while out of town. Mailboxes are displayed at the Metal Club. Installation is available at additional cost. Choice of beige or black; mailbox flags are also available for purchase.

To order a mailbox or questions, go to: mailboxes@scwmetalclub.com
Follow the prompts to send a request.

Social Activities

Social activities are available for members and guests which include informal BBQ, pizza and chili parties at the shop, holiday events, etc.

Visitors & SCW Residents

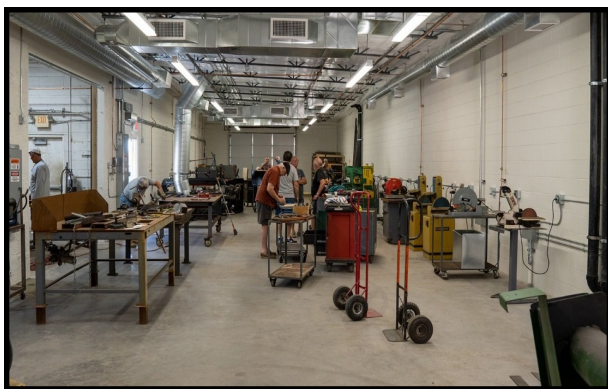

Visitors and Sun City West residents are always welcome for a shop tour during normal operating hours Monday through Friday from 8 a.m. to 4 p.m.

Community Services

The Metal Club offers services to the community including milling and lathe work, repair of garbage container tops, metal fabrication, knife sharpening, welding, etc. Visit the Club and let us know your needs.

Club History

1987 and moved to its present location in 1995. A major addition to the club was completed in 2022 which provides a more comfortable environment for members to work on their various projects.

Shop Equipment

The Metal Club offers up-to-date equipment for working with various metals including several plasma cutting systems, CNC mills, lathes, sheet metal, welding systems, paint booth, powder coating, foundry, etc.

Membership

Membership in the SCW Metal Club is available to all Sun City West Recreation Center card holders. Annual membership dues provide access to metal-working equipment and instruction unavailable elsewhere.

No Experience Required

There are no experience requirements to join the club. Many members had no previous experience working with metals. If you are interested in becoming a member, stop by for a shop tour.

Instructional Classes

A wide range of skills can be learned from several classes including mills and lathes, plasma cutting machines, paint booth, powder-coating, knife making, sheet metal, welding, brazing, computer metal artwork design, foundry and more.
